

The High School “HS” Folder

After the first time you run RinkWriter, an “app.pathRW02” folder is automatically created inside of your desktop Rink Writer folder

The “app.pathRW02” folder contains all of the data for your RinkWriter folder.

This is important **“ONLY”** for **importing rosters**.

Your rink-side scorekeeper will never need to know about any of these folders because they are created and updated in the background when you run the RinkWriter software.
