

Multiple Desktop RinkWriter Folders

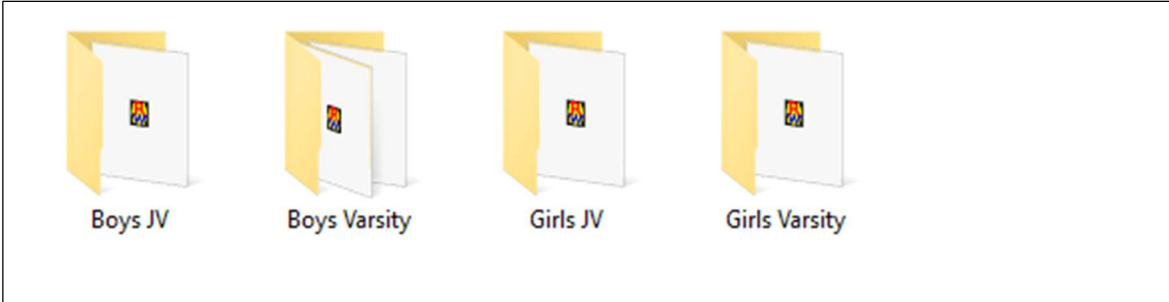

After the first time you run RinkWriter inside of your desktop “Rink Writer” folder, an “app.pathRW02” folder is created inside of the folder.

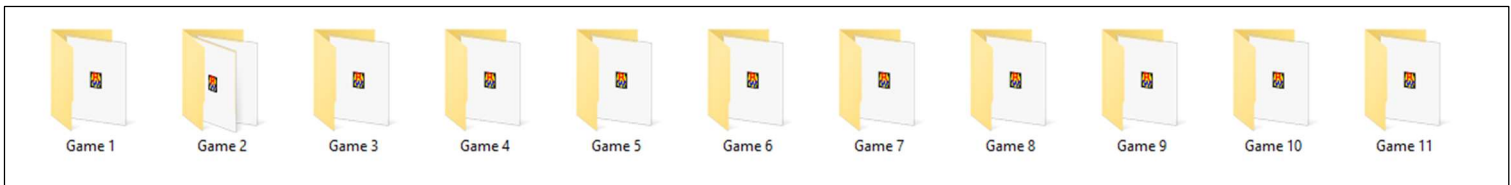

Each “app.pathRW02” folder contains all of the data for its RinkWriter folder. Each folder can represent a unique team or game.

You can copy and paste the RinkWriter folders to make additional folders.

You can make separate folders for each of your teams.
Any folder can be renamed.

If you are setting up a tournament, it is possible to set up games ahead of time.
