

E-mailing Rosters

If a roster is not available, type it directly into RinkWriter's "Rosters" window. Rosters can be sent & received as e-mail attachments or in some cases, they may be downloaded from a web site. The key is to know "where" your rosters are located.

The "app.pathRW02" folder contains all of your data. It is automatically updated and saved while you run the software.

The "app.pathRW02" folder contains 2 folders named as "Game" and "Teams".

To "Send" or "Receive" a roster as E-mail attachment, you must be locate the roster.

To send a roster, open the "app.pathRW02" folder found inside of your RinkWriter folder. Find the roster by opening the appropriate team level folder ...and then attaching the team roster(s) to your outgoing E-mail.

When receiving a roster as an attachment, "Browse" to the "app.pathRW02" folder, inside of your RinkWriter folder, and save the attached roster into the appropriate team level folder. It should be ready to use...if you have the exact team name, level, and age selected in your "Teams" Window.

Multiple rosters can be attached to a single E-mail.
