

# Importing a Roster

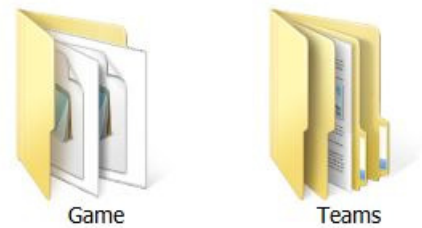

If a roster is not available, Type it directly into RinkWriter's "Rosters" window.

Some rosters may be imported from a web site or they may be shared as E-mail attachments.

The "app.pathRW02" folder contains all of your data. It is automatically updated and saved while you run the software.

The "app.pathRW02" folder contains 2 folders named as "Game" and "Teams".

## Import Rosters

To import a roster...open the "Import Rosters" window on the RinkWriter web site to find a roster.

Select the level or league you are looking for.

- Open the roster to verify that the roster actually exists.
- Right click on the desired team roster and "Save target/link as..."
- Browse to the "Teams" folder inside of your RinkWriter folder's "app.path RW02" folder.
- Browse to the "HS" (or to other level) folder within your "app.path RW02"'s "Teams" folder.
- "Open" the folder and
- "Save" file.
- The roster is now ready to use.
