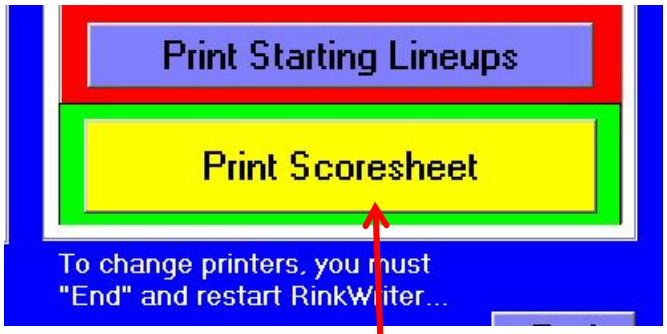
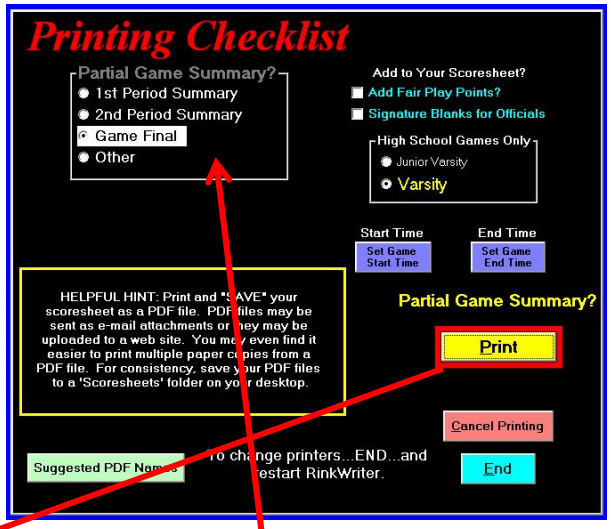
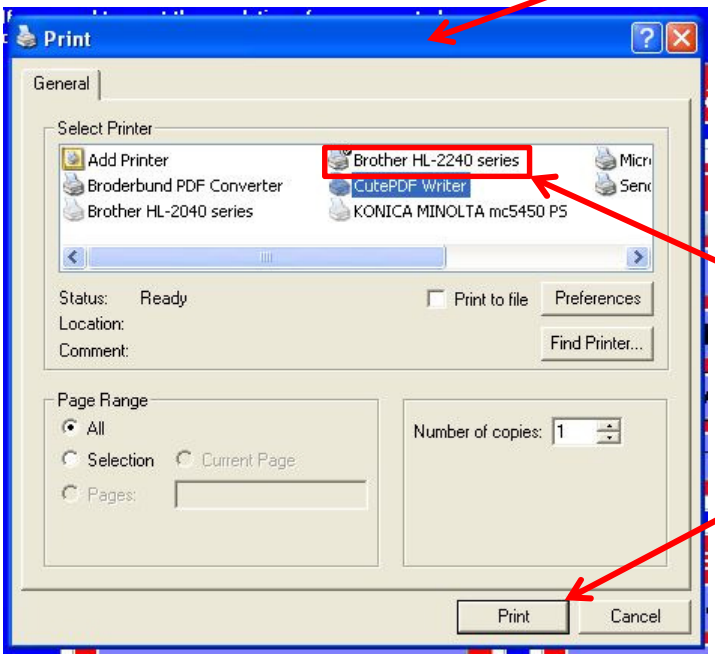
Printing a Paper Scoresheet



Click on “Print Scoresheet” button.





When printing, the default is “Game Final”… However, you may print a 1st or 2nd period summary. By choosing “Other”, you may print the scoresheet at any time during the game.

Choose one of the printers installed on your computer and “Print” your paper copy.

RinkWriter recommends that you print a PDF file first.

The software used (Visual Basic 6.0) to develop RinkWriter has been around for a while and sometimes it will only print one paper copy at a time…and to change printers…you must “End” RinkWriter and reopen it so you can changing printers.

These issues can be averted by first printing a PDF file….and then printing your paper copies from the PDF file. PDF files can also be attached to an E-mail or they can be uploaded to a web site.
