'Shots on Goal' are shots that would go into the net if they were not stopped or deflected (Saved) by the goaltender.

A 'Quality Scoring Chance' is usually considered to be a very good chance for a team to score a goal. It may or may not include a 'shot' on goal. It is a subjective decision made by the scorekeeper(s).

The team 'Winning the Face-off' is usually considered to be the first team to gain clear possession or control of the puck after the draw or face-off.

The Game setting is automatically printed.

Blanks for the Game #, Date/Day, and Time are provided for tournaments.

Optional blanks for Coaches, Records, and the Next Opponents are available.

Tally Shots on Goal

Tally Scoring Chances

Tally Face-offs Won

For tournaments, it is helpful to preprint the worksheets for each game and have them available at rink-side for the scorekeeper. This provides the scorekeeper with information regarding the next game...Home/Away designations, game times and game numbers.

This data can be compiled by a single announcer/scorekeeper, however, if there are additional workers in the penalty box area or in the press box it works well to do this as a team.

The tallied data should be entered into the software immediately after each period.
